FRONTEND ENGINEERING & USER EXPERIENCE

Frontend Engineer with 3+ years shipping user-facing web products that move business metrics lifting conversion 12%, cutting payment abandonment 18%, and deflecting 40% of support tickets across products serving 50K+ users. Blend React/Next.js and TypeScript expertise with UX intuition to turn complex, multi-role workflows into intuitive interfaces. Comfortable owning features end-to-end: user research, prototyping, implementation, A/B testing, and iteration informed by data, not opinion.

KEY COMPETENCIES

React & Next.js	UX & Interaction Design	A/B Testing & Experimentation
TypeScript & JavaScript	Design Systems & Component Architecture	Conversion & Funnel Optimization
Performance & Core Web Vitals	Accessibility (WCAG 2.1 AA)	Cross-Functional Product Collaboration

PROFESSIONAL EXPERIENCE

Klone Oct 2025 - July 2026

Frontend Engineer (Full-time)

Drove a 12% conversion lift and 18% drop in payment abandonment across 5,000+ monthly bookings by redesigning the checkout flow after identifying three friction points through session-recording analysis. Launched a mobile-first design system adopted across four product surfaces, reducing feature delivery time 30% and cutting UI defect rate in half. Partnered with product and design to stand up an A/B testing framework that now gates every high-traffic flow, turning UI decisions from opinion-driven to data-driven.

Geeky Experts Sep 2025 - Dec 2025

Frontend Engineer (Contract)

Redesigned the core analysis workflow, boosting user task completion 35% and keeping p95 interaction latency under 500ms across 2,000+ monthly analysis requests. Shipped an embedded AI chatbot experience (Azure OpenAI) that deflected 40% of inbound support tickets and raised first-contact resolution. Led accessibility remediation to WCAG 2.1 AA, unlocking enterprise procurement deals that had previously been blocked on compliance.

Geeky Experts Jan 2026 - Apr 2026

Frontend Engineer (Contract)

Owned end-to-end UX for a three-role product (admin, parent, teacher), digitising a previously manual reconciliation workflow and cutting fee-verification time 50%. Designed a mobile-first receipt-upload flow with in-browser OCR (tesseract.js) that reduced data-entry errors ~70% by letting parents confirm extracted fields instead of retyping. Shipped the full product in 14 weeks on Next.js 16, TypeScript, and shadcn/ui with Zod-validated forms and role-scoped auth with zero auth-related incidents post-launch.
